

Startup model decision sheet

Describe the business you have evidence for, not just the label you want.
Blank print sheet for handwriting. Use the companion TXT to type longer answers.

Venture / unit: _____ Date: _____

Separate observed facts, assumptions and unknowns. Do not total a score.

1. Whose problem does the venture address?

2. What is the offering today, not the future vision?

3. What repeats between customers?

4. What still requires custom work or founder time?

5. What shows demand: conversations, trials, payments or repeat use?

6. What evidence contradicts the current assumption?

7. What growth is intended, and what constrains it?

8. What remains unknown and what test comes next?

Permission-cleared notes only. A working definition does not establish programme eligibility, demand, safe delivery or profitability. No information is sent by this file.
